Reply to Office action of December 22, 2003
Attorney Docket No. P09843-US1
EUS/J/P/04-1047

This listing of claims replaces all prior versions, and listings, of claims in the application:

Listing of Claims:

B 1
1. (Previously Presented) Arrangement in large Digital Enhanced Cordless Telecommunication (DECT) systems or similar systems, including several Fixed Parts (FP) connected to the same Local Network (LNW), each of said FP associated with one or more Radio Fixed Parts (RFP), comprising: means for assigning a unique Secondary Access Rights Identity (SARI) to the LNW when the first FP is connected, means within the LNW for automatically assigning a unique Primary Access Rights Identity (PARI) to each Fixed Part (FP) by deriving said PARI from a combination of an Equipment Installer's Code (EIC) included in said SARI and one or more generated bits, means within each Fixed Part (FP) for managing the identities of associated Radio Fixed Parts/base stations (RFP) each to have a Radio Fixed Part Number (RPN) that is unique with the Fixed Part (FP).

2. (Previously Presented) Arrangement as claimed in claim 1, further comprising means within said LNW for selecting new Access Rights Identity (ARI) when a new fixed part (FP) is connected.

3. (Previously Presented) Arrangement as claimed in claim 1, further comprising means within the FP for selecting a new base station/Radio Fixed Part Identity when a new base station/Radio Fixed Part is connected.

4. (Previously Presented) Arrangement as claimed in claim 1, wherein said SARI is provided to the network operator by an Equipment Installer, and wherein said Equipment Installer or network operator manually enters said SARI into the network.

Attorney Docket No. P09843-US1
EUS/J/P/04-1047

5. (Previously Presented) Arrangement as claimed in claim 1, further comprising means for distributing said SARI to all the FPs in the network and for transmitting to all RFPs.

6. (Previously Presented) Arrangement as claimed in claim 1, further comprising means for recalculating and distributing the Handover Length Indicator (HLI) to all FPs in the LNW when a new FP is added or removed.

7. (Previously Presented) Arrangement as claimed in claim 1, wherein the RPN for each RFP is handled by the individual FPs, and is automatically given to the RFPs when they are connected.

8. (Previously Presented) Arrangement as claimed in claim 1, wherein the arrangement is implemented as a "plug-and-play" concept.
